

Codastrap

print as you strap

Prints your message, date, batch number, company logo

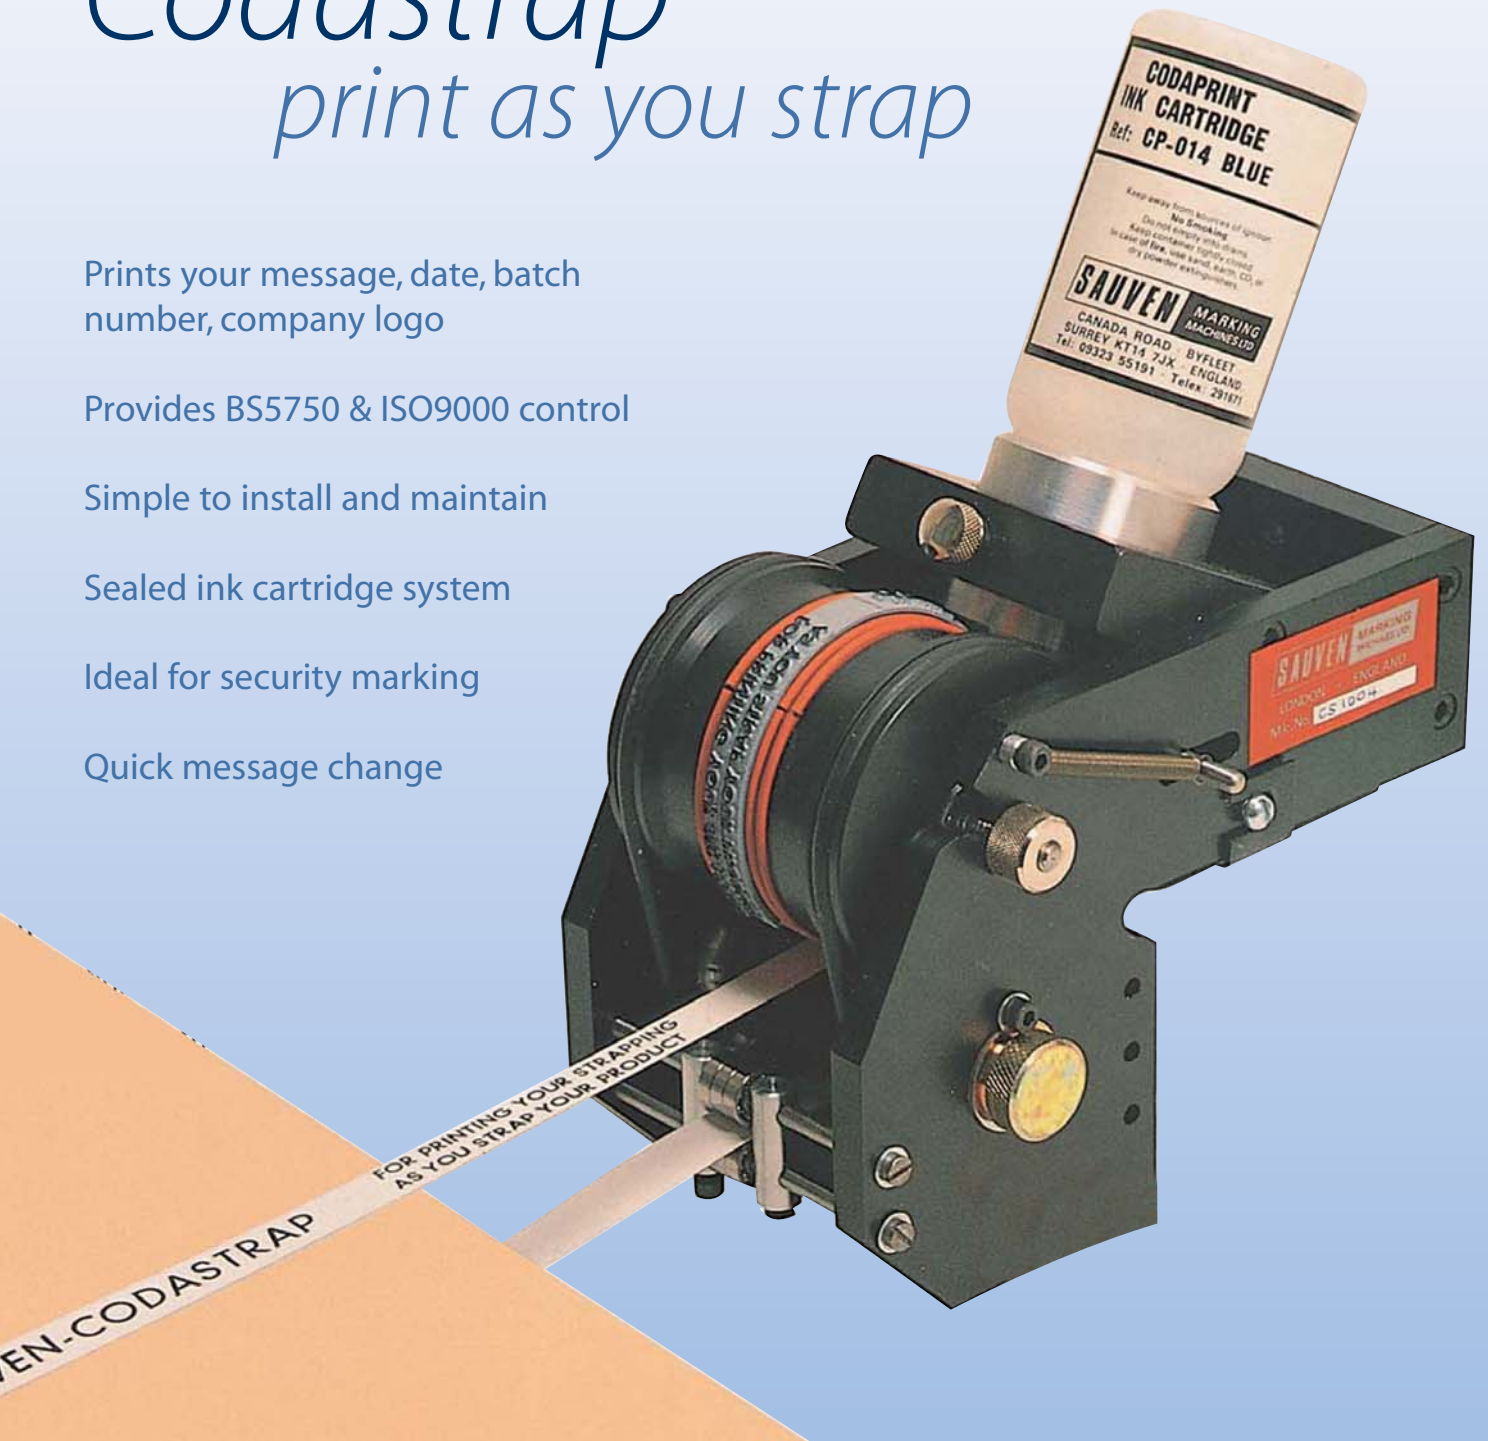

Provides BS5750 & ISO9000 control

Simple to install and maintain

Sealed ink cartridge system

Ideal for security marking

Quick message change

Smart thinking: *Smart printing*

Now you can print your strapping on both automatic and semi-automatic strapping machines using the *new Codastrap printer*.

Using quick change Baselock type and the unique Sauven sealed cartridge system, the *Codastrap* lets you print the message you want for product identification, security marking, advertising or product control.

Easy to install

The *Codastrap* is simple to install on semi-automatic or automatic strapping machines. It can also be mounted on manual dispensing systems just as easily.

Reliable and versatile

The *Codastrap* is driven by the movement of the strapping using very low friction rollers. This ensures normal operation of the strapping machine. The guide rollers are easy to adjust to accommodate any width of strap from 3mm to 45mm, in any thickness.

Quick message change

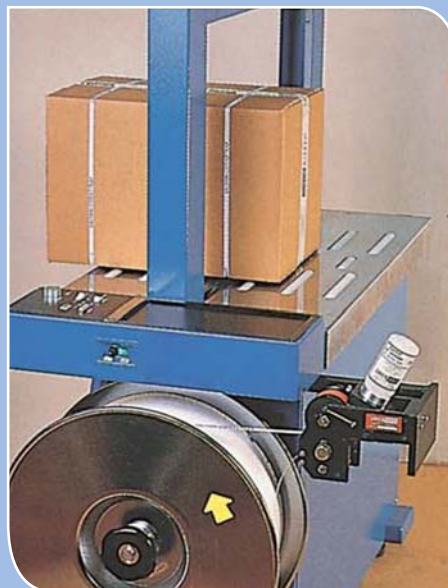

The *Baselock* type system allows the message to be changed in seconds, and the type drum can accommodate a message up to 215mm long. There is a full range of type styles and print heights available as moulded words and logos or separate characters for quick date or batch number changes. Customised logo designs can also be produced.

High quality print

The *Baselock* type and fast drying ink combine to give a quality print on all strapping. This quality remains constant without the need for operator control. The *Codastrap* will print instantly on machine start up even if it has been standing idle for days.

Sealed ink system

The *Codastrap* uses Sauven's unique, well proven sealed ink cartridge system. The cartridge is easily inserted for instant printing. The supply is sealed automatically when printing stops so the ink will not dry out. Cartridges are quickly replaceable, and available in a range of colours.

Features

- High quality printing on all strapping material
- Adjustable for strap width from 3mm to 45mm
- Mounting brackets available for automatic and semi automatic machines
- Designed for very low friction drive
- Quality engineered from non-corrosive material
- Uses the sealed ink cartridge system
- Print length up to 215mm using inter-changeable Baselock type system
